II Report of the Sub-Committee apointed under resolution II of the 28th July 1909, re letter No.575 dated the 18th June 1909 from the -- Executive Engineer, City Improvements Division, Mysore, addressed to the Chief Engineer in the matter of latrines and flush tanks in the Ci

Resolved that the Water Supply in the City should be vested in the President and Chairman and that the location of latrines and flush tanks should be settled after the question of the control of water Supply, the Municipality paying Government for water in excess of a quantity to be fixed in consultation with experts.

Resolved also that Dr.Palpu's Memo may be sent to the Municipality for action being taken to ensure pure water supply.

M.G.Krishnasami Rao

For Chairman

Copy of Deputy Sanitary Commissioner Mr P Palpu's Note dated the 16th July 1909

The water connections asked for are necessary and it is a wonder how the Board were carrying on drainage and general ---- improvement works without water so far The public latrines and drains built till now to prevent nuisances are in themselves ---- great nuisances, without necessary water to keep them clean They would also mean much loss of money to the Board if the water is -- not made available early With certain improvements in the ----- pumping plant, the D P W hopes to meet this extra demand, but it is doubtful whether with the existing leaky reservoirs, and pipes all over, we shall be able to get the water required for flushing There is also the difficulty of the water supply and the Improve--ment works being under separate control Under this arrangement the establishment cost involved is of course greater, and I am afraid the result will also be not as satisfactory as if the ---- drainage and water supply works are under the supervision of one and the same officer The objection that can be raised against this arrangement is whether one officer can have the required -- knowledge of each Department But judging from the last report of the water analysis received showing the presence of Bac coli in the filtered water, I think a local officer can supervise the works and show better results without much technical training I beg to invite the attention of the Board to this important point

The question of the sites for latrines and flush tanks may, I think, be referred to the Health Officer for opinion and then submitted to the Board
